## MICROSmart

IDEC Corporation, a pioneer in the micro-PLC field, is proud to offer the MicroSmart series of programmable logic controllers, the latest in the Micro family of PLCs. These flexible, adaptable PLCs are as compact as they are powerful, so you can create the system you need without increasing your space requirements or your budget.

### The CPU That's Right For You

MicroSmart CPUs are available in two types of modules, All-in-One and Slim. The All-in-One type has models with 10, 16, or 24 I/O points; the Slim type is available in four different 20 I/O modules and two 40 I/O modules. Each CPU module is only 90mm in height and 70mm deep, but it has built-in inputs and outputs as well as standard features like high-speed counters, a RS-232C port and an analog potentiometer. Choose the CPU that's right for you and see what else MicroSmart has to offer.

### Expand Your Control

The Slim type and the 24 I/O All-in-One type CPUs can expand into the ideal system using the optional expansion modules. Need more inputs? More outputs? Some of both? There are 18 available expansion modules, including four analog I/O modules. Depending on your CPU, you can create a system with as many as 264 I/O points (40 I/O Slim type CPU with seven expansion modules).

### Customize Your System

Once you have all the control you need, select the features you want. Store and transfer programs on the memory cartridge or install a real-time clock and calendar cartridge. Add another communications port or an HMI module — it's all possible with MicroSmart. It's even UL-1604 listed, Class 1-Div. 2 for hazardous locations. Create the perfect solution for all of your applications, exactly the way you want it.

# Multiple Standard Features

## Pulse Output/Trapezoidal Control

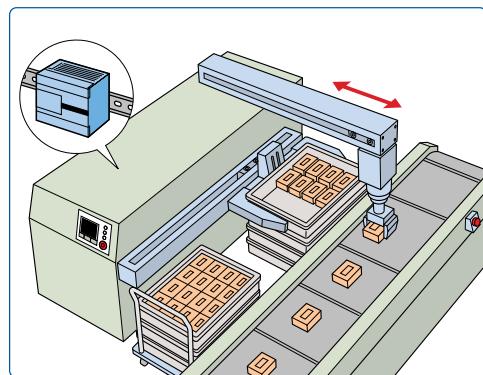

Independent dual-axis control is available with two pulse outputs. Locational values can be easily defined for precise positional (trapezoidal) control.

- \* Pulse output instruction
- \* PWM instruction
- (Pulse Width Modulation control)

### Pulse Output Function Specifications

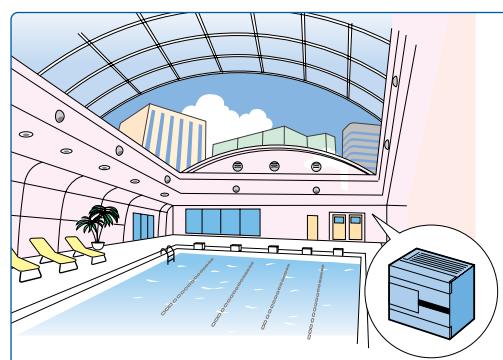

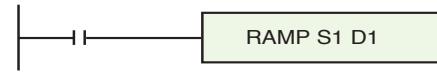

Number of output points	2
Maximum output frequency	20 kHz

\*Only one point of trapezoidal control is available.

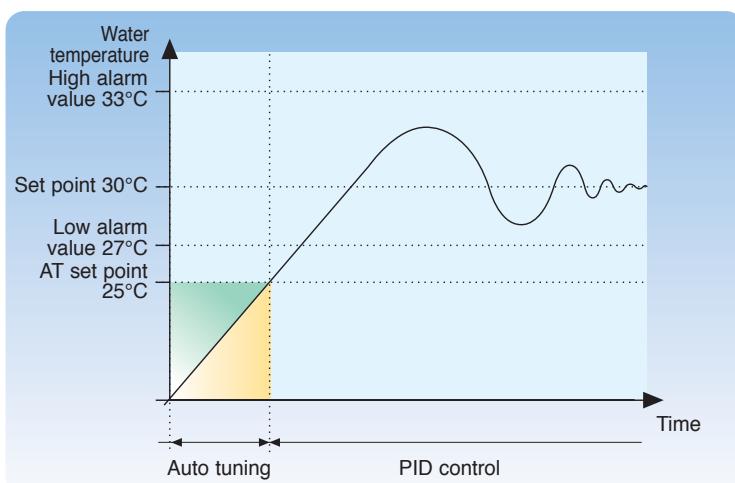

Setting the desired values enables you to precisely manage the trapezoidal control

Operation mode (S1)	1
Steady pulse frequency (S1 + 1)	50
Initial pulse frequency (S1 + 2)	10
Frequency change rate (S1 + 3)	2
Preset value (S1 + 6, 7)	10,000

## PID Control

To automatically maintain a target water temperature (PID control), use the auto tuning function to perform sampling. Based on the determined PID parameters, PID control is executed automatically. (Slim type CPU units only.)

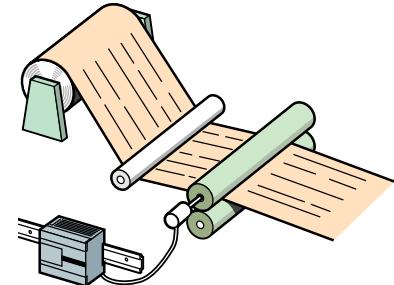

Set point	30
AT set point	25
High alarm value	35
Low alarm value	27

## High-speed Counters

The MicroSmart has four built-in high speed counters. One high speed counter (all-in-one type) or two high speed counters (slim type) can be used as either two-phase or single-phase high speed counters at a maximum of 20kHz. The other three (all-in-one type) or two (slim type) have a maximum frequency of 5kHz. High speed counters are used for simple positioning and motor control.

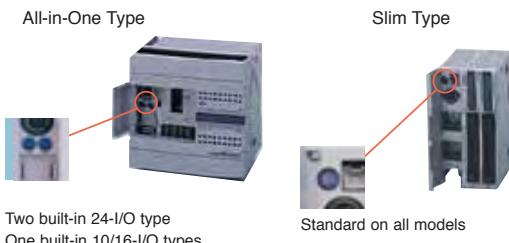

Type	Single-phase	Two-phase
<b>Maximum Input Frequency</b>	HSC1 and 4: 20 kHz HSC2 and 3: 5 kHz	HSC1: 20 kHz HSC4: 20 kHz (SlimType CPU)
<b>Counting Range</b>	16 bits (0 to 65,535)	16 bits (0 to 65,535)
<b>Operation Mode</b>	Adding counter	Rotary encoder (phases A, B, Z)
<b>Gate Input</b>	Enable/disable counting	Enable/disable counting
<b>Current Value Reset</b>	Current value is reset to zero when the current value reaches the pre-set value.	Current value is reset to a given value when overflow or underflow has occurred.

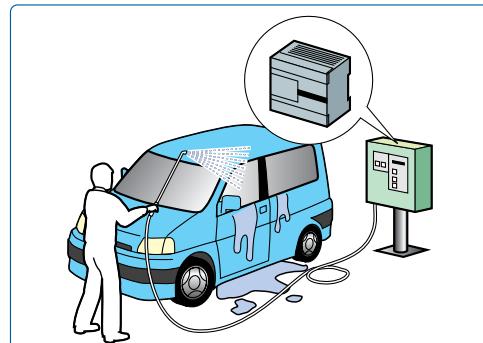

The rotary encoder can connect directly to the paper feeder. The high-speed counter receives and reads output pulses from the rotary encoder.

## Analog Potentiometer

The analog potentiometer built into the CPU module enables settings to be adjusted without special tools.

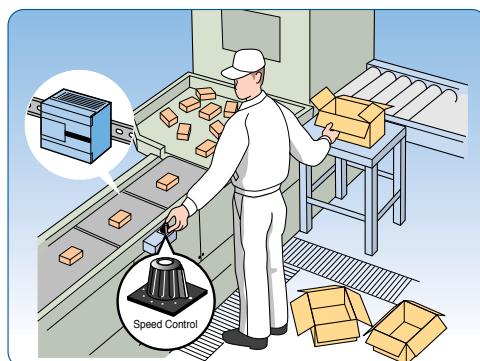

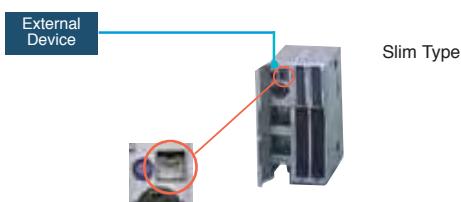

Two built-in 24-I/O type  
One built-in 10/16-I/O types

After installation the analog potentiometer in the CPU module allows you to easily change values such as timer preset values or the volume of water.

## Built-in Analog Voltage Input

Ready for connecting 0 to 10V DC from an external device directly to the built-in analog voltage input connector (Slim type CPU modules only).

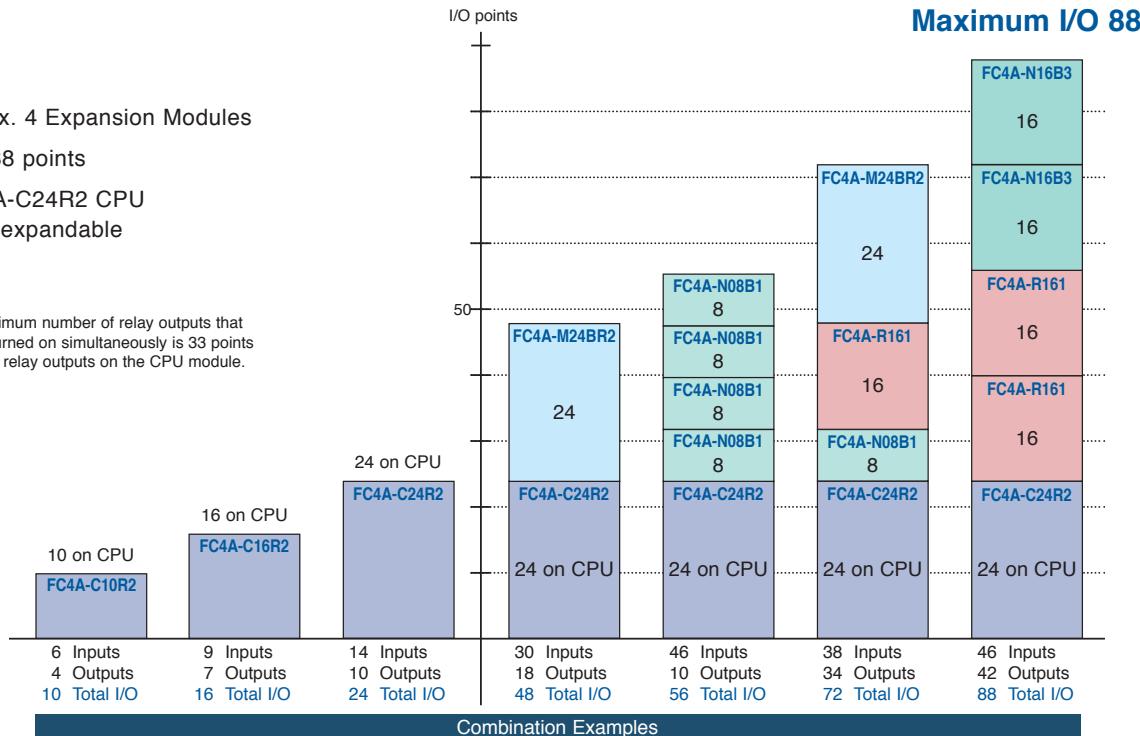

# Add And Combine Modules

## All-In-One Type

- Attach Max. 4 Expansion Modules
- Max. I/O 88 points
- Only FC4A-C24R2 CPU Module is expandable

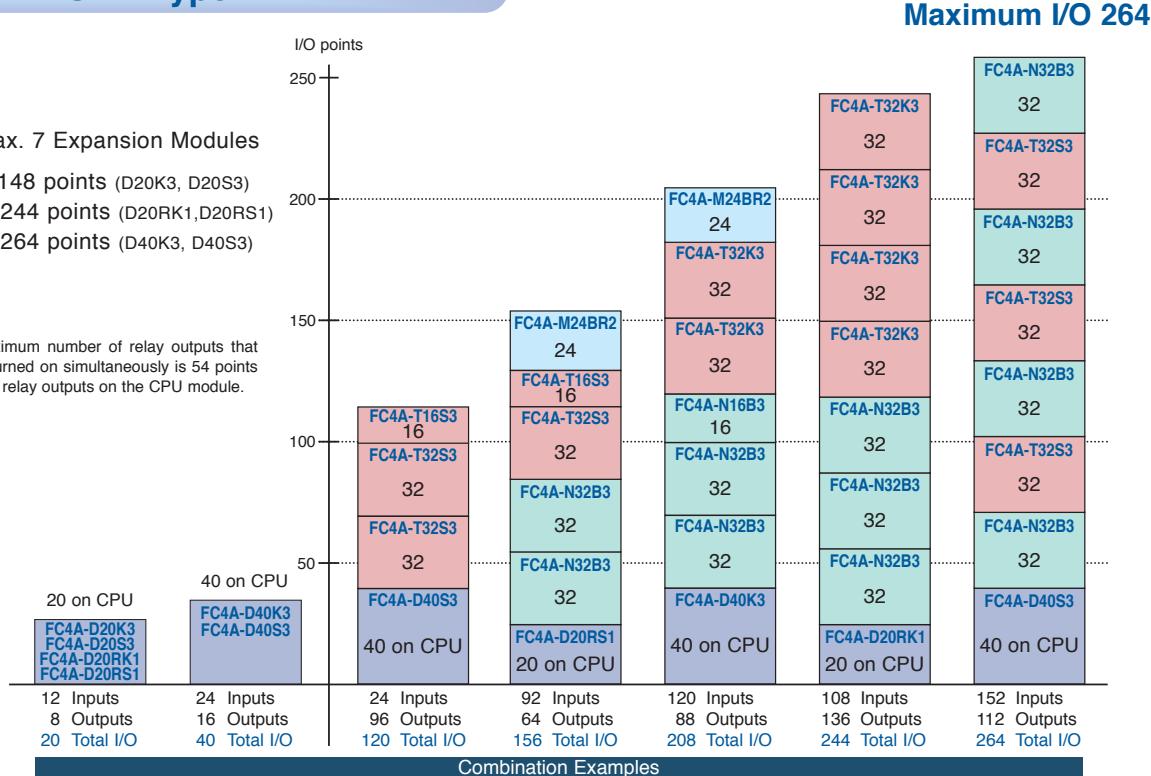

**Note:** The maximum number of relay outputs that can be turned on simultaneously is 33 points including relay outputs on the CPU module.

## Slim Type

- Attach Max. 7 Expansion Modules
- Max. I/O 148 points (D20K3, D20S3)  
244 points (D20RK1, D20RS1)  
264 points (D40K3, D40S3)

**Note:** The maximum number of relay outputs that can be turned on simultaneously is 54 points including relay outputs on the CPU module.

# Customize MicroSmart To Meet Your Needs

## All-in-One Type

**FC4A-C10R2, FC4A-C16R2, FC4A-C24R2**

Communication Adapters (FC4A-C10R2 not applicable)

RS232C Communication Adapter  
(FC4A-PC1)  
(Mini-DIN Type)

RS485 Communication Adapter  
(FC4A-PC2)  
(Mini-DIN Type)

RS485 Communication Adapter  
(FC4A-PC3)  
(Screw Terminal Type)

HMI Module  
(FC4A-PH1)

Expansion I/O Module

(FC4A-C10R2 and FC4A-C16R2 not expandable)

Memory Cartridge  
(FC4A-PM32) or  
(FC4A-PM64)

Clock Cartridge  
(FC4A-PT1)

## Slim Type

**FC4A-D20K3, FC4A-D20S3, FC4A-D20RK1**

**FC4A-D20RS1, FC4A-D40K3, FC4A-D40S3**

Communication Adapters

RS232C Communication Adapter  
(FC4A-PC1)  
(Mini-DIN Type)

RS485 Communication Adapter  
(FC4A-PC2)  
(Mini-DIN Type)

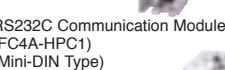

RS485 Communication Adapter  
(FC4A-PC3)  
(Screw Terminal Type)

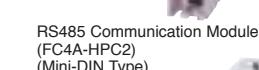

Communication Modules

HMI Base Module  
(FC4A-HPH1)

RS232C Communication Module  
(FC4A-HPC1)  
(Mini-DIN Type)

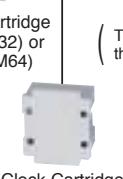

RS485 Communication Module  
(FC4A-HPC2)  
(Mini-DIN Type)

RS485 Communication Module  
(FC4A-HPC3)  
(Screw Terminal Type)

Expansion I/O Module

Memory Cartridge  
(FC4A-PM32) or  
(FC4A-PM64)

Clock Cartridge  
(FC4A-PT1)

(Two kinds of cartridges can be used at  
the same time with slim type CPUs only.)

# CPU Modules

## CPU Modules

**FC4A-C10R2**

6 input points  
4 output points  
Relay output  
100 to 240V AC  
4.8KB memory

**FC4A-C16R2**

9 input points  
7 output points  
Relay output  
100 to 240V AC  
15KB memory

**FC4A-C24R2**

14 input points  
10 output points  
Relay output  
100 to 240V AC  
27KB memory  
88 max I/O expandability

I/O modules not applicable to these two models

**FC4A-D20K3**

12 input points  
8 output points  
0.3A transistor sink output  
24V DC  
27KB memory  
148 max I/O expandability

**FC4A-D20RK1**

12 input points  
8 output points  
0.3A transistor sink output  
24V DC  
31.2KB memory  
244 max I/O expandability  
240V AC-2A/30V DC-2A relay output

\*Transistor output 2 points and relay output 6 points

**FC4A-D40K3**

24 input points  
16 output points  
0.3A transistor sink output  
24V DC  
31.2KB memory  
264 max I/O expandability

**FC4A-D20S3**

12 input points  
8 output points  
0.3A transistor source output  
24V DC  
27KB memory  
148 max I/O expandability

**FC4A-D20RS1**

12 input points  
8 output points  
0.3A transistor source output  
24V DC  
31.2KB memory  
244 max I/O expandability  
240V AC-2A/30V DC-2A relay output

**FC4A-D40S3**

24 input points  
16 output points  
0.3A transistor source output  
24V DC  
31.2KB memory  
264 max I/O expandability

# Expansion Modules And Options

## DC Input Modules - 4 Types

**8-point DC Input Module**  
**FC4A-N08B1**  
8 input points  
24V DC sink/source input  
Removable screw terminal

**16-point DC Input Module**  
**FC4A-N16B1**  
16 input points  
24V DC sink/source input  
Removable screw terminal

**16-point DC Input Module**  
**FC4A-N16B3**  
16 input points  
24V DC sink/source input  
MIL connector

**32-point DC Input Module**  
**FC4A-N32B3**  
32 input points  
24V DC sink/source input  
MIL connector

## Output Modules - 8 Types

**8-point Relay Output Module**  
**FC4A-R081**  
8 output points  
Relay output (1NO contact)  
Removable screw terminal

**16-point Relay Output Module**  
**FC4A-R161**  
16 output points  
Relay output (1NO contact)  
Removable screw terminal

**8-point Transistor Sink Output Module**  
**FC4A-T08K1**  
8 output points  
0.3A transistor sink output  
Removable screw terminal

**8-point Transistor Source Output Module**  
**FC4A-T08S1**  
8 output points  
0.3A transistor source output  
Removable screw terminal

**16-point Transistor Sink Output Module**  
**FC4A-T16K3**  
16 output points  
0.1A transistor sink output  
MIL connector

**16-point Transistor Source Output Module**  
**FC4A-T16S3**  
16 output points  
0.1A transistor source output  
MIL connector

**32-point Transistor Sink Output Module**  
**FC4A-T32K3**  
32 output points  
0.1A transistor sink output  
MIL connector

**32-point Transistor Source Output Module**  
**FC4A-T32S3**  
32 output points  
0.1A transistor source output  
MIL connector

# Expansion Modules And Options Cont.

## Combination I/O Modules - 2 Types

**4 Input/4 Output Combination Module  
FC4A-M08BR1**  
4 input points/4 output points  
24V DC sink/source input  
240V AC-2A/30V DC-2A relay output  
Removable screw terminal

**16 Input/8 Output Combination Module  
FC4A-M24BR2**  
16 input points/8 output points  
24V DC sink/source input  
240V AC-2A/30V DC-2A relay output  
Wire-clamp terminal

## Analog Modules - 4 Types

**1 Output Analog Module  
FC4A-K1A1**

1 analog output (voltage/current)  
Removable screw terminal

**2 Input Analog Module  
FC4A-J2A1**

2 analog input (voltage/current)  
Removable screw terminal

**2 Input/1 Output Analog Module  
FC4A-L03AP1**

2 analog input (thermocouple/RTD)  
1 analog output (voltage/current)  
Removable screw terminal

**2 Input/1 Output Analog Module  
FC4A-L03A1**

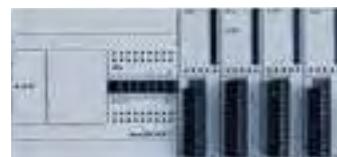

2 analog input (voltage/current)  
1 analog output (voltage/current)  
Removable screw terminal

## Expansion Module Examples

(Example 1)

Module	Type No.	Input	Output
CPU	FC4A-C24R2	14	10
DC Input	FC4A-N16B1	16	0
DC Input	FC4A-N16B1	16	0
Relay Output	FC4A-R161	0	16
Relay Output	FC4A-R161	0	16
Total		46	42

(Example 2)

Module	Type No.	Input	Output
CPU	FC4A-C24R2	14	10
DC Input	FC4A-N08B1	8	0
DC Input/Relay Output	FC4A-M08BR1	4	4
Relay Output	FC4A-R081	0	8
Transistor Sink Output	FC4A-T08K1	0	8
Total		26	30

# Easy Operation Using The HMI Module

Easy mounting

Ease of operation and compact size

No need for special tools

Recover a system failure immediately by reading the error codes.

Set the time and calendar with optional clock cartridge

**The HMI Module allows you to access the following menus**

- Timer Menu
- Counter Menu
- Data Register Menu
- Input Menu
- Output Menu
- Internal Relay Menu
- Shift Register Menu
- Error Menu
- Run/Stop Menu
- Calendar Menu
- Clock Menu

Clock Cartridge

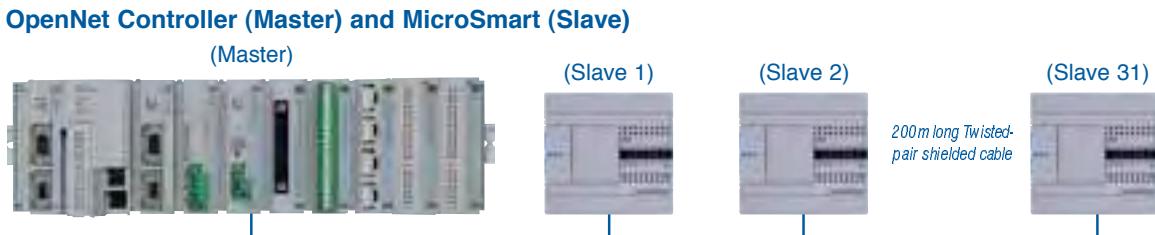

Monitor and change the status and setup of your CPU while the system is in operation

# Communication Capabilities Expand The Network Of Control Systems

## Serial Communication Functions

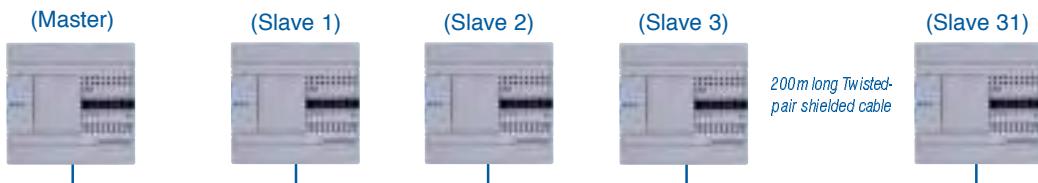

### Data Link System

(The Data Link System is not available for the All-in-One 10 I/O module)

Establishes a data link system using the OpenNet Controller as a master and a maximum of 31 MicroSmart CPU modules as slaves. Distributed control on an RS485 network is made possible without the need for communication programs.  
(RS485 communication adapter is required to set up a data link system.)

### MicroSmart (Master) and MicroSmart (Slave)

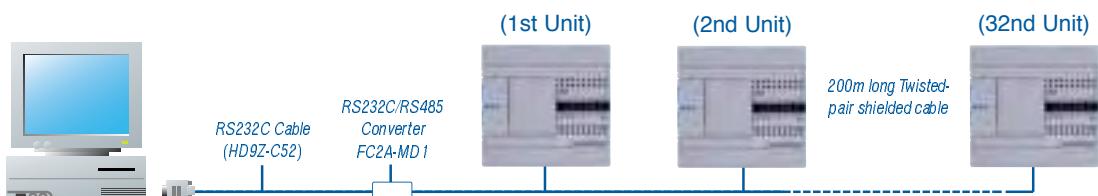

Distributed MicroSmart CPU modules at each processing stage can be controlled as one integrated system without a host. One MicroSmart as a master interface with up to 31 MicroSmart modules on an RS485 network without the need for communication programs.

(RS485 communication adapter is required to set up a data link system.)

## Computer Link System (1:N)

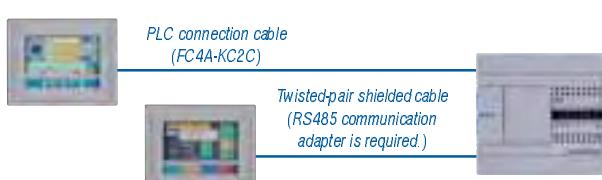

### MicroSmart (Master) and MicroSmart (Slave)

Up to 32 MicroSmart modules can be connected to a PC. The values of timers and counters, data of data registers, and I/O status can be monitored on the PC. Also, user programs can be downloaded to the MicroSmart to establish a total supervisory system.

(RS485 communication adapter is required to set up a 1:N computer link system.)

## Connecting to Operator Interface

The MicroSmart can be connected to IDEC's HG series Operator Interface. The HG series can exchange data with each device in the MicroSmart. Also, the HG can graphically display the values of timers and counters, data of data register, and I/O status.

# Windows Compatible Programming Software

## WindLDR® for Windows

WindLDR® is a software package to program the MicroSmart and all of IDEC's other programmable logic controllers. Upgraded WindLDR® version 4.0 or higher supports new functions incorporated in the MicroSmart, such as partial download (16 and 24 I/O type units only) and comment download functions.

**Note:** Please use WindLDR® 4.0 or higher for programming MicroSmart.

### System Requirements

OS: Windows 2000, Windows 98, Windows 95, Windows NT4.0 (Service Pack 3 or higher)

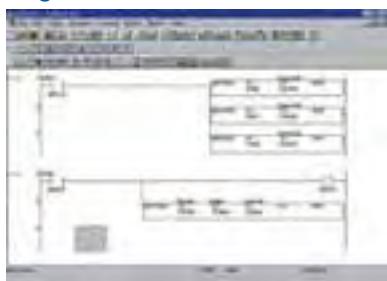

CPU: Pentium 75MHz or higher

Memory: 24MB of available RAM on Windows 95 and Windows 98, 32MB of available RAM on Windows NT

HD: 20MB of available hard-disk space

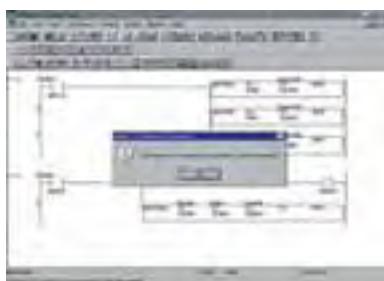

The WindLDR® modem communication function cannot be used on Windows 95.

### 1. Improved Operation of the Ladder Program Editor

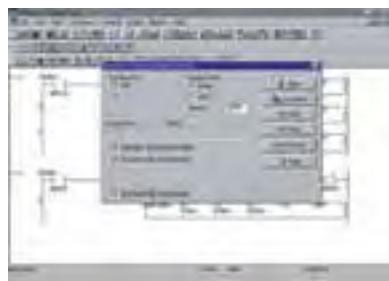

The right power rail can be fixed. When a program line exceeds the right power rail, a connection line is automatically inserted. Also, the ladder program can be printed out with a fixed power rail for clear viewing.

### 2. Cache Function in Ladder to Mnemonic Conversion

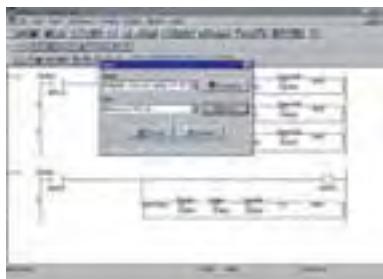

When a user program is modified, WindLDR® 4.0 or higher converts only the modified portion of the program, saving conversion time when modification and downloading are repeated during debugging.

### 3. Comment Download Function

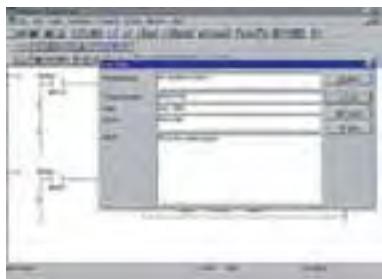

The MicroSmart can store comments attached to the user program. Since a user program can be downloaded to the MicroSmart with comments attached to operands and rungs, the recorded comments can be restored from the MicroSmart without a ladder file. This function is also available on the OpenNet Controller.

### 4. Modem Communication

WindLDR® can supervise operation and collect data from a remote PLC via modem and phone line. Control possibilities can be expanded by using the modem control function of the MicroSmart or OpenNet Controller.

### 5. Cover Page

A cover page editor is provided to record the program name and creation date. The cover page stores information on each user program to help archive many user programs.

# MICROSmart Product Selection List

## The Next Generation of PLC

- Compact CPU modules available in All-in One or Slim types with 10, 16, 20, 24, or 40 I/O
- DC Input, Relay Output, Transistor Output, Combination I/O and Analog I/O expansion modules
- 24 I/O All-in-One CPU expandable to 88 I/O points; 20 I/O slim types expandable up to 148 or 244 I/O; 40 I/O slim type expandable up to 264 I/O
- Standard RS232 port, optional plug-in RS485/RS232 port
- Optional memory cartridge or real-time clock and calendar cartridge
- UL listed for hazardous locations

### CPU Modules (All-in-One Type)

Power Voltage	Input Type	Output Type	I/O Points	Part No.
100-240V AC 50/60 Hz	24V DC (Sink/Source)	Relay Output 240V AC/30V DC, 2A	10-I/O Type ( 6 in / 4 out)	FC4A-C10R2
			16-I/O Type ( 9 in / 7 out)	FC4A-C16R2
			24-I/O Type (14 in / 10 out)	FC4A-C24R2

### CPU Modules (Slim Type)

Power Voltage	Input Type	Output Type	High-speed Transistor Output	I/O Points	Part No.
24V DC	24V DC (Sink/Source)	Transistor Sink Output 0.3A	Sink Output 0.3A	20 (12 in / 8 out)	FC4A-D20K3
		Transistor Source Output 0.3A			FC4A-D20S3
		Relay Output 240V AC/30V DC, 2A	Sink Output 0.3A	20 (12 in / 8 out)*	FC4A-D20RK1
			Source Output 0.3A		FC4A-D20RS1
		Transistor Sink Output 0.3A	Source Output 0.3A	40 (24 in / 16 out)	FC4A-D40K3
		Transistor Source Output 0.3A			FC4A-D40S3

Note \*: Two points are transistor outputs, and six points are relay outputs.

### Input Modules

Input Type	Input Points	Terminal	Part No.
24V DC (Sink/Source)	8 points	Removable Terminal Block	FC4A-N08B1
	16 points		FC4A-N16B1
	16 points	MIL Connector	FC4A-N16B3
	32 points		FC4A-N32B3

### Output Modules

Output Type	Output Points	Terminal	Part No.
Relay Output 240V AC/30V DC, 2A	8 points	Removable Terminal Block	FC4A-R081
	16 points		FC4A-R161
Transistor Sink Output 0.3A	8 points	MIL Connector	FC4A-T08K1
			FC4A-T08S1
			FC4A-T16K3
Transistor Source Output 0.3A	16 points	MIL Connector	FC4A-T16S3
			FC4A-T32K3
			FC4A-T32S3
Transistor Sink Output 0.1A	32 points		
Transistor Source Output 0.1A			
Transistor Sink Output 0.1A	32 points		
Transistor Source Output 0.1A			

### Combination I/O Modules

Input Type	Output Type	I/O Points	Terminal	Part No.
24V DC (Sink/Source)	Relay Output 240V AC/30V DC, 2A	8 (4 in / 4 out) 24 (16 in / 8 out)	Removable Terminal Block Non-removable Terminal Block	FC4A-M08BR1 FC4A-M24BR2

### Analog I/O Modules

Name	Input Type	Output Type	I/O Points	Terminal	Part No.
Analog I/O Module	Voltage (0-10V DC) Current (4-20mA)	Voltage (0-10V DC) Current (4-20mA)	2 inputs 1 output	Removable Terminal Block	FC4A-L03A1
	Thermocouple Resistance thermometer				FC4A-L03AP1
Analog Input Module	Voltage (0-10V DC) Current (4-20mA)	-	2 inputs		FC4A-J2A1
Analog Output Module	-	Voltage (0-10V DC) Current (4-20mA)	1 output		FC4A-K1A1

### HMI Module

Name	Description	Part No.
HMI Module	For displaying and changing required operands	FC4A-PH1
HMI Base Module	For mounting HMI module with slim type CPU module	FC4A-HPH1

### Programming Software

Name	Part No.
Programming and Monitoring Software [WindLDR Ver.4.*]	FC9Y-LP2CDW

### For Slim Type CPU Module

Name	Description	Part No.
RS232C Communication Module	Mini DIN connector type for slim type CPU module	FC4A-HPC1
RS485 Communication Module	Mini DIN connector type for slim type CPU module	FC4A-HPC2
	Terminal block type for slim type CPU module	FC4A-HPC3

Rated Power Frequency	50/60Hz (47 to 63Hz)				-						
Maximum Input Current	0.25A (85V AC)	0.30A (85V AC)	0.45A (85V AC) <sup>*2</sup>	0.56A (26.4V DC) <sup>*3</sup>	0.70A (26.4V DC) <sup>*3</sup>						
Maximum Power Consumption	30VA/264V AC <sup>*1</sup> 20VA/100V AC	31VA/264V AC <sup>*1</sup> 22VA/100V AC	40VA/264V AC <sup>*2</sup> 33VA/100V AC	15W/26.4V DC <sup>*3</sup>	19W/26.4V DC <sup>*3</sup>						
Allowable Momentary Power Interruption	20 msec (at the rated inputs and outputs)				10 msec (at 24V DC)						
Dielectric Strength	Between power and $\oplus$ terminals: 1500V AC, 1 minute Between I/O and $\oplus$ terminals: 1500V AC, 1 minute				Between power and $\ominus$ terminals: 500V AC, 1 minute Between I/O and $\ominus$ terminals: 1500V AC, 1 minute						
Insulation Resistance (500V DC megger)	Between power and $\oplus$ terminals: 10 M $\Omega$ minimum Between I/O and $\oplus$ terminals: 10 M $\Omega$ minimum				Between power and $\ominus$ terminals: 10 M $\Omega$ minimum Between I/O and $\ominus$ terminals: 10 M $\Omega$ minimum						
Noise Resistance	AC power terminals: 1.5 kV, 50 nsec to 1 $\mu$ sec I/O terminals (coupling clamp): 1.5 kV, 50 nsec to 1 $\mu$ sec				DC power terminals: 1.0 kV, 50 nsec to 1 $\mu$ sec I/O terminals (coupling clamp): 1.5 kV, 50 nsec to 1 $\mu$ sec						
Inrush Current	35A maximum	35A maximum	40A maximum	50A maximum (24V DC)							
Power Supply Wire	UL1015 AWG22, UL1007 AWG18										
Operating Temperature	0 to 55°C										
Storage Temperature	-25 to +70°C										
Relative Humidity	Level RH1, 30 to 95% (non-condensing)										
Altitude	Operation: 0 to 2,000m (0 to 6,565 feet) Transport: 0 to 3,000m (0 to 9,840 feet)										
Pollution Degree	2 (IEC 60664)										
Corrosion Immunity	Free from corrosive gases										
Degree of Protection	IP20										
Grounding Wire	UL1007 AWG16			UL1015 AWG22, UL1007 AWG18							
Vibration Resistance	DIN rail mounted Direct mounted	10 to 57 Hz amplitude 0.075 mm, 57 to 150 Hz acceleration 9.8 m/sec <sup>2</sup> (1G) 2 hours in each of 3 axes 2 to 25 Hz amplitude 1.6 mm, 25 to 100 Hz acceleration 39.2 m/sec <sup>2</sup> (4G) 90 minutes in each of 3 axes									
Shock Resistance	147 m/sec <sup>2</sup> (15G), 11 msec duration, 3 shocks per axis, on three mutually perpendicular axes (IEC 61131)										
Weight	230g	250g	305g	140g	185g	180g					

<sup>\*1</sup> The CPU module power consumption includes 250 mA sensor power

<sup>\*2</sup> CPU module (including 250 mA sensor power) + 4 I/O modules

<sup>\*3</sup> CPU module + 7 I/O modules

## DC Input Specifications

Part No.	FC4A-C10R2	FC4A-C16R2	FC4A-C24R2	FC4A-D20K3 FC4A-D20S3	FC4A-D20RK1 FC4A-D20RS1	FC4A-D40K3 FC4A-D40S3							
Rated Input Voltage	24V DC sink/source input signal												
Input Voltage Range	20.4 to 28.8V DC			20.4 to 26.4V DC									
Rated Input Current	I0 and I1: I2 to I7, I10 to I15:	11 mA 7 mA/point (24V DC)		I0, I1, I6, I7: I2 to I5, I10 to I27:	5 mA/point (24V DC) 7 mA/point (24V DC)								
Input Impedance	I0 and I1: I2 to I7, I10 to I15:	2.1 kΩ 3.4 kΩ		I0, I1, I6, I7: I2 to I5, I10 to I27:	5.7 kΩ 3.4 kΩ								
Turn ON Time	I0 to I5: I6, I7, I10 to I15:	35 μsec + filter value 40 μsec + filter value		I0 to I7: I10 to I27:	35 μsec + filter value 40 μsec + filter value								
Turn OFF Time	I0 and I1: I2 to I7, I10 to I15:	45 μsec + filter value 150 μsec + filter value		I0, I1, I6, I7: I2 to I5, I10 to I27:	45 μsec + filter value 150 μsec + filter value								
Input Points	6 (6/1 common)	9 (9/1 common)	14 (14/1 common)	12 (12/1 common)	12 (12/1 common)	24 (12/1 common)							
Connector	On Mother Board	–			FL26A2MA (Oki Electric Cable)	MC1.5/13-G-3.81BK (Phoenix Contact)							
	Insertion/Removal Durability	–			100 times minimum								
Isolation	Between input terminals	Not isolated											
	Internal circuit	Photocoupler isolated											
Input Type	Type1 (IEC61131)												
External Load for I/O Interconnection	Not needed												
Signal Determination Method	Static												
Effect of Improper Input Connection	Both sinking and sourcing input signals can be connected. If any input exceeding the rated value is applied, permanent damage may be caused.												
Cable Length	3m (9.84 ft.)												

## Transistor Sink and Source Output Specifications

Part No.	FC4A-D20K3 FC4A-D20S3	FC4A-D20RK1 FC4A-D20RS1	FC4A-D40K3 FC4A-D40S3
Output Points and Common Line	8 (8/1 common)	2 (2/1 common)	16 (8/1 common)
Output Type	FC4A-D20K3/D20RK1/D40K3: Sink output FC4A-D20S3/D20RS1/D40S3: Source output		
Rated Load Voltage	24V DC		
Operating Load Voltage Range	20.4 to 28.8V DC		
Rated Load Current	0.3A per output point		
Maximum Load Current	1A per common line		
Voltage Drop (ON Voltage)	1V maximum (voltage between COM and output terminals when output is on)		
Inrush Current	1A maximum		
Leakage Current	0.1 mA maximum		
Clamping Voltage	39V±1V		
Maximum Lamp Load	8W		
Inductive Load	L/R = 10 ms (28.8V DC, 1Hz)		
External Current Draw	100mA maximum, 24V DC (power voltage at the +V or -V terminal)		
Isolation	Between output terminal and internal circuit	Photocoupler isolated	
	Between output terminals	Not isolated	
Connector	On Mother Board	FL26A2MA (Oki Electric Cable)	MC1.5/16-G-3.81BK (Phoenix Contact)
	Insertion/Removal Durability	100 times minimum	
Output Delay	Turn ON time	5μs (Q0,Q1), 300μs max (Q2 to Q7, Q10 to Q17)	
	Turn OFF time	5μs (Q0,Q1), 300μs max (Q2 to Q7, Q10 to Q17)	

## Relay Output Specifications

Part No.	FC4A-C10R2	FC4A-C16R2	FC4A-C24R2	FC4A-D20RK1 FC4A-D20RS1
No. of Outputs	4	7	10	8
Output Points per Common Line	COM0	3	4	(2 Transistor Output)
	COM1	1	2	4
	COM2	–	1	1
	COM3	–	–	1
Output Type	1NO			
Maximum Load Current	2A per point			
	8A per common line			
Minimum Switching Load	0.1 mA/0.1V DC (reference value)			
Initial Contact Resistance	30 mΩ maximum			
Electrical Life	100,000 operations minimum (rated load 1,800 operations/hour)			
Mechanical Life	20,000,000 operations minimum (no load 18,000 operations/hour)			
Rated Load (resistive/inductive)	240V AC/2A, 30V DC/2A			
Dielectric Strength	Between output and terminals	1,500V AC, 1 minute		
	Between output terminal and internal circuit	1,500V AC, 1 minute		
	Between output terminals (COMs)	1,500V AC, 1 minute		
Connector	On Mother Board	–		*9
	Insertion/Removal Durability	–		100 times minimum

## Specifications (Expansion I/O Module)

### DC Input Module Specifications

Part No.	FC4A-N08B1	FC4A-N16B1	FC4A-N16B3	FC4A-N32B3
Input Points	8 (8/1 common)	16 (16/1 common)	32 (16/1 common)	
Rated Input Voltage	24V DC sink/source input signal			
Input Voltage Range	20.4 to 28.8V DC			
Rated Input Current	7 mA/point (24V DC)	5 mA/point (24V DC)		
Input Impedance	3.4 kΩ	4.4 kΩ		
Turn ON Time (24V DC)	4 msec			
Turn OFF Time (24V DC)	4 msec			
Isolation	Between input terminals: Not isolated Internal circuit: Photocoupler isolated			
External Load for I/O Interconnection	Not needed			
Signal Determination	Static			
Effect of Improper Input Connection	Both sinking and sourcing input signals can be connected. If any input exceeding the rated value is applied, permanent damage may be caused.			
Cable Length	3m (9.84 ft.) in compliance with electromagnetic immunity			
Connector	on Mother Board	MC1.5/10-G-3.81BK (Phoenix Contact)	FL20A2MA (Oki Electric Cable)	
	Insert/Remove Durability	100 times minimum		
Internal Current Draw	All Inputs ON	25 mA (5V DC) 0 mA (24V DC)	40 mA (5V DC) 0 mA (24V DC)	35 mA (5V DC) 0 mA (24V DC)
	All Inputs OFF	5 mA (5V DC) 0 mA (24V DC)	5 mA (5V DC) 0 mA (24V DC)	10 mA (5V DC) 0 mA (24V DC)
Weight	85g	100g	65g	100g

### Transistor Output Module Specifications

Part No.	FC4A-T08K1 FC4A-T08S1	FC4A-T16K3 FC4A-T16S3	FC4A-T32K3 FC4A-T32S3
Output/Common Lines	8 (8/1 common)	16 (16/1 common)	32 (16/1 common)
Output Type	FC4A-T□K□: Transistor sink output FC4A-T□S□: Transistor source output		
Rated Load Voltage	24V DC		
Oper. Load Volt. Range	20.4 to 28.8V DC		
Rated Load Current	0.3A/output pt. (@ 28.8V DC)	0.1A/output pt. (@ 28.8V DC)	
Maximum Load Current per point	0.36A (@ 28.8V DC)	0.12A (@ 28.8V DC)	
Load Current per common	3A (@ 28.8V DC)	1A (@ 28.8V DC)	
Voltage Drop (ON)	1V max (voltage between COM & output terminals - output on)		
Inrush Current	1A maximum		
Leakage Current	0.1 mA maximum		
Clamping Voltage	39V±1V		
Maximum Lamp Load	8W		
Inductive Load	L/R = 10 msec (28.8V DC, 1Hz)		
External Current Draw	FC4A-T□K□:100 mA max, 24V DC (power voltage at +V) FC4A-T□S□:100 mA max, 24V DC (power voltage at -V)		
Isolation	Between output terminal and internal circuit:Photocoupler isolated Between output terminals:Not isolated		
Connector	on Mother Board	MC1.5/10-G-3.81BK (Phoenix Contact)	FL20A2MA (Oki Electric Cable)
	Insert/Remove Durability	100 times minimum	
Internal Current Draw	All Inputs ON	10 mA (5V DC) 20 mA (24V DC)	10 mA (5V DC) 40 mA (24V DC)
	All Inputs OFF	5 mA (5V DC) 0 mA (24V DC)	5 mA (5V DC) 0 mA (24V DC)
Output Delay	Turn ON time	300 μsec maximum	
	Turn OFF time	300 μsec maximum	
Weight	85g	70g	105g

### Relay Output Module Specifications

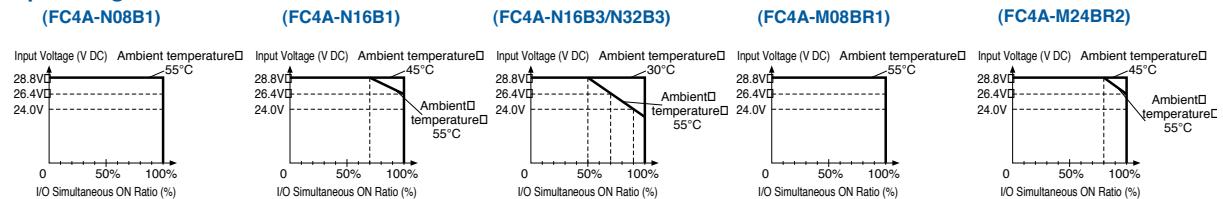

Part No.	FC4A-R081	FC4A-R161
Outputs/Common Lines	8 (4/1 common)	16 (8/1 common)
Output Type	1NO	
Maximum Load Current per point	7A	8A
Min. Switching Load	0.1 mA/0.1V DC (reference value)	
Contact Resistance	30 mΩ maximum	
Electrical Life	100,000 operations min. (rated load 1,800 operations/hour)	
Mechanical Life	20,000,000 operations min. (no load 18,000 operations/hour)	
Rated Load (resistive/inductive)	240V AC/2A, 30V DC/2A	
Dielectric Strength	Between output and $\oplus$ or $\ominus$ terminals: 1,500V AC, 1 min. Between output term. and internal circuit: 1,500V AC, 1 min. Between output term. (COMs): 1,500V AC, 1 min.	
Connector	on Mother Board	MC1.5/11-G-3.81BK (Phoenix Contact)
	Insert/Remove Durability	100 times minimum
Internal Current Draw	All Inputs ON	30 mA (5V DC) 40 mA (24V DC)
	All Inputs OFF	5 mA (5V DC) 0 mA (24V DC)
Weight	110g	145g

### Combination I/O Module Specifications

Part No.	FC4A-M08BR1	FC4A-M24BR2
Input Points	4 (4/1 common)	16 (16/1 common)
Rated Input Voltage	24V DC sink/source input signal	
Input Voltage Range	20.4 to 28.8V DC	
Rated Input Current	7 mA/point (24V DC)	
Input Impedance	3.4 kΩ	
Turn ON Time	4 msec (24V DC)	
Turn OFF Time	4 msec (24V DC)	
Isolation	Between input terminals: Not isolated Internal circuit: Photocoupler isolated	
External Load for I/O Interconnection	Not needed	
Signal Determination	Static	
Effect of Improper Input Connection	Both sinking and sourcing input signals can be connected. If any input exceeding the rated value is applied, permanent damage may be caused.	
Cable Length	3m (9.84 ft.) in compliance with electromagnetic immunity	
Output Points	4 (4/1 common)	8 (4/1 common)
Output Type	1NO	
Maximum Load Current per point	2A	
Load Current per common	7A	
Min. Switching Load	0.1 mA/0.1V DC (reference value)	
Contact Resistance	30 mΩ maximum	
Electrical Life	100,000 operations min. (rated load 1,800 operations/hour)	
Mechanical Life	20,000,000 operations min. (no load 18,000 operations/hour)	
Rated Load (resistive/inductive)	240V AC/2A, 30V DC/2A	
Dielectric Strength	Between out and $\oplus$ or $\ominus$ terminals: 1,500V AC, 1 minute Between out terminal and internal circuit: 1,500V AC, 1 minute Between out terminal (COMs): 1,500V AC, 1 minute	
Connector	on Mother Board	MC1.5/11-G-3.81BK (Phoenix Contact)
	Insert/Remove Durability	100 times minimum
Internal Current Draw	All Inputs ON	25 mA (5V DC) 20 mA (24V DC)
	All Inputs OFF	5 mA (5V DC) 0 mA (24V DC)
Weight	95g	140g

## Analog Input Specifications (Continued)

Part No.	FC4A-L03A1, FC4A-J2A1, L03AP1		FC4A-L03AP1 Only			
Input Signal Type	Voltage Input	Current Input	Resistance Thermometer	Thermocouple		
Operating Mode			Self-scan			
Conversion Method			$\Sigma\Delta$ type ADC			
Input Error	Maximum Error at 25°C	$\pm 0.2\%$ of full scale		$\pm 0.2\%$ of full scale plus reference junction compensation accuracy ( $\pm 4^\circ\text{C}$ maximum)		
	Temperature Coefficient	$\pm 0.006\%$ of full scale /°C				
	Repeatability after Stabilization Time	$\pm 0.5\%$ of full scale				
	Non-linearity	$\pm 0.2\%$ of full scale				
	Maximum Error	$\pm 1\%$ of full scale				
Data	Digital Resolution	4096 increments (12 bits)				
	Input Value of LSB	2.5 mV	4 $\mu\text{A}$	K: 0.325°C J: 0.300°C T: 0.100°C		
	Data Type in Application Program	0 to 4095 (12-bit data) -32768 to 32767 (optional range designation) (Note 2)				
	Monotonicity	Yes				
	Input Data Out of Range	Detectable (Note 3)				
Noise Resistance	Maximum Temporary Deviation during Electrical Noise Tests	$\pm 3\%$ maximum when a 500V clamp voltage is applied to the power and I/O wiring (Note 4)				
	Common Mode Characteristics	Common mode reject ratio (CMRR): -50 dB				
	Common Mode Voltage	16V DC				
	Input Filter	No				
	Cable	Twisted pair shielded cable is recommended for improved noise immunity		—		
Crosstalk						
Dielectric Strength						
Type of Protection						
Effect of Improper Input Connection						
Maximum Permanent Allowed Overload (No Damage)		13V DC	40 mA DC	—		
Selection of Analog Input Signal Type		Using software programming				
Method of Input Type Selection		Programming Software Configured				

Note 1: Total input system transfer time = Sample repetition time  $\times$  2 + 1 scan time

Note 2: The 12-bit data (0 to 4095) processed in the analog I/O module can be linear-converted to a value between -32768 and 32767. The optional range designation, and analog I/O data minimum and maximum values can be selected using data registers allocated to analog I/O modules.

Note 3: When an error is detected, a corresponding error code is stored to a data register allocated to analog I/O operating status.

Note 4: Accuracy of the resistance thermometer is not assured when noise is applied.

## Analog Output Specifications

Part No.	FC4A-L03A1, FC4A-L03AP1, FC4A-K1A1				
Output Signal Type	Voltage Output	Current Output			
Output Range	0 to 10V DC	4 to 20 mA DC			
Load Impedance	2 k $\Omega$ minimum	300 $\Omega$ maximum			
Applicable Load Type	Resistive load				
Settling Time	20 msec				
Total Output System Transfer Time	20 msec + 1 scan time				
Output Error	Maximum Error at 25°C	$\pm 0.2\%$ of full scale			
	Temperature Coefficient	$\pm 0.015\%$ of full scale /°C			
	Repeatability after Stabilization Time	$\pm 0.5\%$ of full scale			
	Output Voltage Drop	$\pm 1\%$ of full scale	—		
	Non-linearity	$\pm 0.2\%$ of full scale			
	Output Ripple	1 LSB maximum			
	Overshoot	0%			
Data	Total Error	$\pm 1\%$ of full scale			
	Digital Resolution	4096 increments (12 bits)			
	Output Value of LSB	2.5 mV	4 $\mu\text{A}$		
	Data Type in Application Program	0 to 4095 (12-bit data) -32768 to 32767 (optional range designation) (Note 5)			
	Monotonicity	Yes			
Noise Resistance	Current Loop Open	—	Detectable (Note 6)		
	Maximum Temporary Deviation during Electrical Noise Tests	$\pm 3\%$ maximum when a 500V clamp voltage is applied to the power and I/O wiring			
	Cable	Twisted pair shielded cable is recommended for improved noise immunity			
Crosstalk					
No crosstalk because of 1 channel output					
Dielectric Strength					
500V between output and power circuit					
Type of Protection					
Photocoupler between output and internal circuit					
Effect of Improper Output Connection					
No damage					
Selection of Analog Output Signal Type					
Using software programming					
Method of Output Type Selection					

Note 5: The 12-bit data (0 to 4095) processed in the analog I/O module can be linear-converted to a value between -32768 and 32767. The optional range designation, and analog I/O data minimum and maximum values can be selected using data registers allocated to analog I/O modules.

Note 6: When an error is detected, a corresponding error code is stored to a data register allocated to analog I/O operating status.

# Programming Instruction Commands

## Basic Instruction List

Symbol	Function	Qty of Bytes
LOD	Stores intermediate results and reads contact status	6
LODN	Stores intermediate results and reads inverted contact status	6
OUT	Outputs the result of bit logical operation	6
OUTN	Outputs the inverted result of bit logical operation	6
SET	Sets output, internal relay, or shift register bit	6
RST	Resets output, internal relay, or shift register bit	6
AND	Series connection of NO contact	4
ANDN	Series connection of NC contact	4
OR	Parallel connection of NO contact	4
ORN	Parallel connection of NC contact	4
AND · LOD	Series connection of circuit blocks	5
OR · LOD	Parallel connection of circuit blocks	5
BPS	Saves the result of bit logical operation temporarily	5
BRD	Reads the result of bit logical operation which was saved temporarily	3
BPP	Restores the result of bit logical operation which was saved temporarily	2
TML	Subtracting 1-sec timer (0 to 65535 sec)	4
TIM	Subtracting 100-msec timer (0 to 6553.5 sec)	4
TMH	Subtracting 10-msec timer (0 to 655.35 sec)	4
TMS	Subtracting 1-msec timer (0 to 65.535 sec)	4
CNT	Adding counter (0 to 65535)	4
CDP	Dual pulse reversible counter (0 to 65535)	4
CUD	Up/down selection reversible counter (0 to 65535)	4
CC=	Equal to comparison of counter current value	7
CC≥	Greater than or equal to comparison of counter current value	7
DC=	Equal to comparison of data register value	8
DC≥	Greater than or equal to comparison of data register value	8
SFR	Forward shift register	6
SFRN	Reverse shift register	6
SOTU	Rising-edge differentiation output	5
SOTD	Falling-edge differentiation output	5
JMP	Jumps a designated program area	4
JEND	Ends a jump instruction	4
MCS	Starts a master control	4
MCR	Ends a master control	4
END	Ends a program	2
